Summary

Software Engineer with **nearly 4 years of experience** building enterprise backend systems using **Java, Spring Boot, Redis, and MySQL.** Proven track record of scaling high-throughput services and delivering B2B insurance platforms.

Experience

Vivant360 Software Services Jan 2023 – Present
Software Developer — Java, Spring Boot, Hibernate, Redis, MySQL, ReactJS *Tirunelveli, India*

- Architected an end-to-end B2B insurance portal using Java, Spring Boot, Hibernate, MySQL, and Redis, **automating 80% of policy processing across 4 insurance product lines.**
- Re-architected core backend services and **optimized complex MySQL queries**, scaling quote **throughput from 2.5M to over 5.7M requests daily, a 128% increase.**
- Decoupled high-throughput asynchronous workflows using **Redis Streams and Consumer Groups**, reducing overall quote and **approval times by 40%** while supporting 765+ motor quotes per day.
- Modernized core enterprise architecture to Spring Boot 3.5.10 and Java 21 while consolidating scattered APIs, **accelerating transaction processing by 70%** and reducing API **response overhead by 35%.**
- Built a centralized **JWT/RBAC** auth service with Spring Security and Redis token blacklisting, supporting authentication **across 10+ microservice routes**.

Projects

Real-Time Event Processing System | *Java, Spring Boot, Kafka, Redis* GitHub

- Engineered a decoupled Kafka + Redis Streams pipeline with consumer-group recovery and deduplication to **handle traffic spikes of 10K+ events per second.**
- Reduced event-processing latency by **35%** with zero data loss across load-test runs processing **10K+ events per second.**

Shield (Digital Wellbeing App) | *Kotlin, Android, MVVM* GitHub

- Developed a Kotlin/MVVM **Android app** using accessibility services to monitor and **block user-selected scrolling apps**, supporting **4+ configurable app** restrictions.
- Implemented **real-time app monitoring with sub-second blocking response**, enabling users to automatically restrict distracting applications.

Education

St. Xavier's College Tirunelveli, India
Master of Computer Applications (MCA) · CGPA: 8.6 *Graduated: 2023*

Technical Skills

Languages: Java, SQL, JavaScript
Backend: Spring Boot, REST APIs, Microservices
Databases & Caching: MySQL, Redis (Caching, Streams, Consumer Groups, Pub/Sub)
Frontend: ReactJS, Next.js
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Jenkins (CI/CD), Git, Agile/Scrum
Concepts: OOP, SOLID, Design Patterns, LLD/HLD, Multithreading & Concurrency, DSA, Distributed Systems

Awards & Achievements

- **Outstanding Excellence Award (2023) @ Vivant360:** Built and launched an automated B2B insurance platform, reducing manual processing by 80%.
- **Client Recognition Award (2024) @ RAK Insurance, Dubai:** Delivered critical backend system enhancements, reducing complaint-resolution time by 40%.
- **2nd Place Winner (2026) @ VDSA Hackathon:** Prototyped a Kotlin-based digital wellbeing app (Shield) under a strict deadline.
